

Allen Kang

Senior Product Designer

allensmkang@gmail.com · allenkang.com · linkedin.com/in/mooque · Toronto, Canada

Senior product designer with 8 years on transaction-heavy products: payment and donation flows, financial data reconciled across three tax jurisdictions, and the design system behind a three-product merger. I pair research with A/B testing and data visualization, prototype in code, and ship end to end, including a live-music app I designed and built solo, now in beta.

EXPERIENCE

Aplos (now Velora) · Senior Product Designer Feb 2025 – Jun 2026

- Designed split transactions so one payment can be logged as a donation, an in-kind gift, and the value of goods received, compliant across Canadian, US, and Australian tax rules. Categorization support tickets fell 70% in the first month.
- Ran a four-variation A/B test on Raisely's donation fee flow, measured in Pendo. Fee opt-in rose from 75% to 92% while conversion and average gift size held steady.
- Led integration design across Aplos, Keela, and Raisely after the acquisition: data import and export, schema translation, and visible, editable data mapping for accurate, auditable financial records.
- Consolidated 340+ components from three products into one Figma and Storybook library, owning deprecation, naming governance, and adoption across three engineering teams.
- Ran the first joint design reviews between the merged engineering teams; the format became the default for cross-product work. Mentored two designers.

Keela · Product Design Lead Mar 2023 – Feb 2025

- Led the design system refresh that became Orchid, pitched to leadership with surveys from five departments.
- Redesigned the contact record fundraisers open before every call to lead with recent change instead of lifetime totals.
- Led design for Pipelines and Reports & Dashboards, and set up the launch process. Mentored one designer.

Keela · Product Designer & Associate PM Feb 2021 – Mar 2023

- Designed Automation, a no-code workflow builder, a month into the role: 30% adoption across 355 organizations, contributing to a 13% ARR increase.
- Stepped in as Associate PM to ship the Pipelines feature, earning recognition for autonomy and leadership.

Forkable · UX/UI Designer (Contract) Jan 2020 – Sep 2022

- Moved the product design practice from Sketch to Figma and built the component library and design system that came out of it.

MyJourney · UX/UI Designer Aug 2019 – Jul 2022

- Ran user research and usability testing with patients and clinicians for a cancer-care web and mobile app.
- Designed clinician dashboards that track patients across treatment stages, and tools for the teams running cancer conferences.

INDEPENDENT PROJECTS

ARND · Founding designer and developer, live-music discovery app 2025 – Present

- Designed and built solo with agentic AI tooling on live curated Toronto listings; in public beta at arnd.app, with the App Store release next. iOS build carried through App Store readiness: Sign in with Apple, account deletion, a privacy manifest, VoiceOver and Dynamic Type.

Yuwol Productions · Designer and developer, internal tools for a Toronto musical company Oct 2025 – Present

- Built scheduling and attendance, a bilingual (Korean and English) script reader, and a bill splitter, used daily by a forty-person company with no technical background, iterating weekly on direct feedback.

Forkestrate · Founding designer, AI recipe app 2025 – Present

- With a PM and two engineers, took a conversational recipe app from zero to MVP in under three months.

SKILLS

Design systems · A/B testing · Data visualization · Research and usability testing · Prototyping in code (React, TypeScript) · Figma, Storybook, Pendo, Amplitude

EDUCATION & CERTIFICATIONS

Bachelor of Design, Graphic Design · YSDN (York University & Sheridan College joint program), 2012 – 2017

Certifications: Google Generative AI & Responsible AI · Coursera Python 3 · IDEO U Design Thinking
